Choropleth Maps vs. Graduated Symbols	Esri	Cartography	When mapping quantitative data in polygons, should you represent the values with color, to make a choropleth map, or size, to make a graduated symbol map? It depends on whether you are mapping raw or derived values. This video shares examples and analogies in ArcGIS Online and ArcGIS Pro to help make sense of this cartographic rule.
Improve A Map Legend | Quick Cartography in ArcGIS	Esri	Cartography	One of the easiest ways to improve a map is to improve its legend. This video shares an example of creating a clear legend in ArcGIS Online.
Improve Layer Names In A Map | Quick Cartography in ArcGIS	Esri	Cartography	Good cartography is not just about colors and symbols, it's also about the words on your map. The symbols on your map may be excellent, but if the layer names describing them aren't clear, the symbols won't work. This video shares an example in ArcGIS Online of how to create clear and concise layer names.
Choose Different Colors to Map Different Things	Esri	Cartography	In this ArcGIS tutorial on cartography and symbology, learn how to choose similar colors to represent similar things, and different colors to represent different things. This video shows an example of employing this technique in ArcGIS Online.
Does Your Map Allow for Meaningful Comparisons?	Esri	Cartography	When normalizing a choropleth map, your goal is to allow for more meaningful comparisons. This video shows examples of how to achieve this.
Enabling Data Download in Your ArcGIS Dashboards	Esri	Dashboards	Did you know you can leverage data downloads in your ArcGIS Dashboard? Learn how to enable this functionality to easily collaborate and share data within your dashboard.
Three Easy Steps to Copy an ArcGIS Dashboard	Esri	Dashboards	Have you ever seen a dashboard created with ArcGIS Dashboards and wondered, "How did they make that?" In this short video Esri instructor Brittney White teaches you a quick trick to make a copy of an existing dashboard so you can explore how the dashboard was configured.

How to create an ArcGIS StoryMap	Esri Ireland	Story Maps	ArcGIS StoryMaps are an effective storytelling tool that utilise geographic information system (GIS) based maps. In this video tutorial, Solenn Reeves Long demonstrates how to create a StoryMap using ArcGIS. She covers the basics of setup, adding content, as well as more advanced configurations. This ArcGIS StoryMap tutorial is aimed at beginners who are looking to create their first StoryMap. You will learn how to create custom StoryMaps that are both informative and visually appealing. To get the most out of this video it is recommended that you have most of your content ready before you begin. This could include text, images, videos and of course maps. With regards to mapping you can have a map pre-made and stored in your ArcGIS Online account or you can create the contextual maps within StoryMaps using Express maps and Map Tours. Learn to tell your story with an interactive map by adding points, pop-ups, and arrows. This will give your narrative a strong sense of place to illustrate spatial relationships.
